The Container Analysis Project

Gather info about images from DockerHub
https://github.com/mtarsel/ContainerAnalysis

Mick Tarsel – Cognitive Systems Engineer
IBM Systems

April, 2019

GOAL

- Execute it

- Development info

- Discuss features

App	amd64	ppc64le	s390x	Images	Container	amd64	ppc64le	s390x	Tag Exists?
ibm-redis-ha-dev	Y	Y	N						
				redis-ha	4.0.6-r0	Y	Y	N	Y
ibm-rabbitmq-dev	Y	Y	Y						
				rabbitmq NOT FOUND IN REPO	3.7.3-management-alpine	N	N	N	N
ibm-open-liberty	Y	Y	Y						
				open-liberty NOT FOUND IN REPO	javaee8	N	N	N	N
				hazelcast	3.10.6	N	N	N	Y
ibm-skydive-dev	Y	Y	Y						
				skydive	0.21.0	Y	Y	Y	Y
				elasticsearch	5.5.1	Y	Y	N	Y
ibm-was-vm-quickstarter-dev	Y	N	N						
				wasaas-console	2.0.5	N	N	N	Y

IBM

<Code Overview >
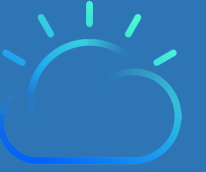

Querying DockerHub

Objects!

Application(name, url):
keywords, repos, sub_images, ...

ibm-skydive-dev

Hub(registry, uname, upass)

Image(name, org, container)
archs, containers, ...

skydive
elasticsearch

Tag(name, arch...)

0.21.0
5.51

Code Execution

helm-index.yaml → parse_index_yaml() → Applications/ created → add_header_to_yaml()

runit(app_list, hub_list) → dockerhub.com → results.csv
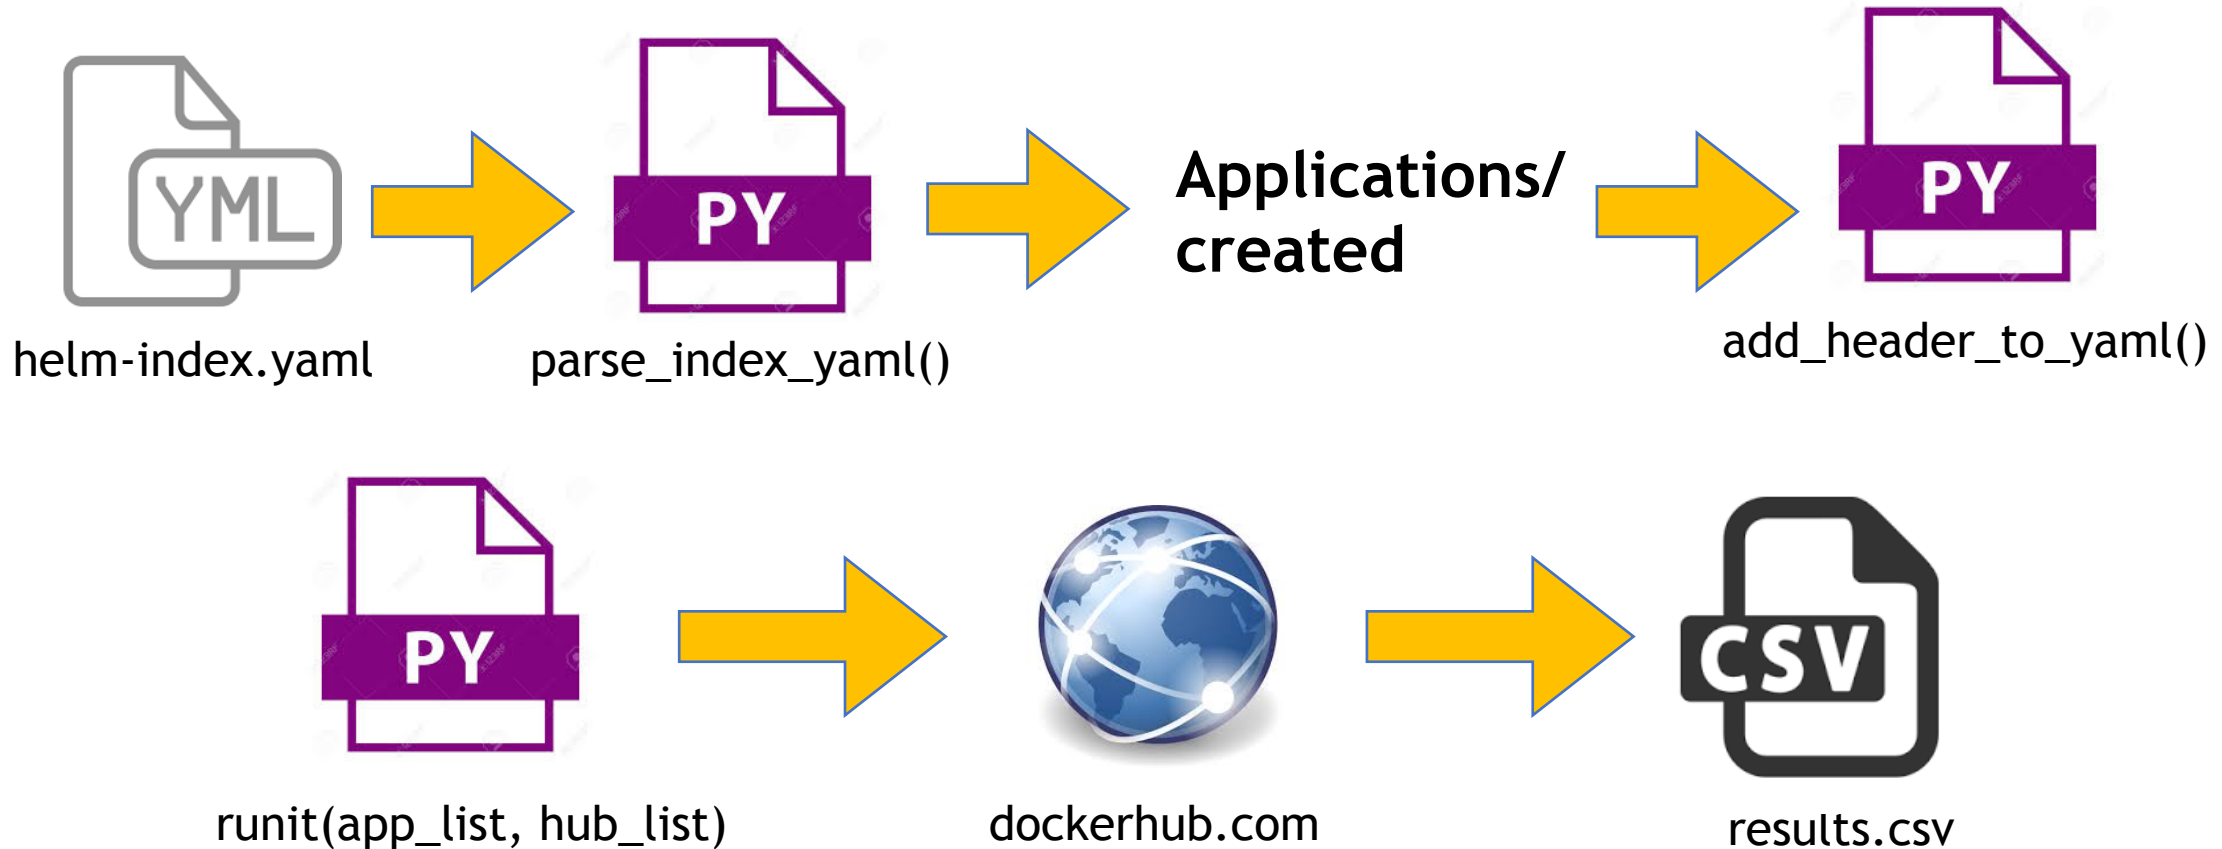

DockerHub v2 API

- Obtain Image manifest file online using URLs
- Manifest format: an HTML page with JSON
- https://docs.docker.com/registry/spec/api/
- https://github.com/IBM/charts/tree/master/stable

Examples:

No tags for an image: https://hub.docker.com/v2/repositories/ppc64le/couchdb/tags/?page_size=100

1 tag for the image: https://hub.docker.com/v2/repositories/ppc64le/elk/tags/?page_size=100

skydive 0.21.0 tag: https://hub.docker.com/v2/repositories/ibmcom/skydive/tags/0.21.0/

elasticsearch: https://hub.docker.com/v2/repositories/ibmcom/elasticsearch/tags/

Note: the url specifies a repo, image name, and tag

Future Work

- Enabling more repos
- Results cross-check
- Adding Product Name to Application
- Output
- Increased Documentation

https://github.com/mtarsel/ContainerAnalysis

Thank you :)
